

PRANYVA

Beauty & Health

**brings you the best of authentic, traditional
Ayurveda in the modern world.**

PRANYVA comes from the word **PRANA**. PRANA (literally in Sanskrit means «life», «breath» or «constant motion») one of the central notions of the traditional Indian medicine, is understood as a vital energy of life. PRANA refers to the cosmic energy believed to come from the sun and connecting the elements of the universe. The universal principle of energy or force, responsible for the body's life, heat and maintenance, PRANA is the sum total of all energy that is manifest in the universe. This life energy, PRANA has been vividly invoked and described in the Vedas. And this life energy is the basis of **Ayurveda**, because **PRANA** is a force that permeates the entire Universe and energises all things in the Universe. Even the vacuum of space is filled with this invisible energy. The word **Ayurveda** consists of two words and means **SCIENCE** (Veda) of **LIFE** (Ayur). And the word Ayur is a synonym of **PRANA**.
